What is Polycarbonate?

Polycarbonate is a clear, durable, shatterproof material that is known for its impact resistance.

Polycarbonate made materials are far stronger than those made from acrylic. It's used in applications which demand high performance properties such as in bulletproof windows, riot shields, eyewear lenses etc. This thermoplastic polymer has a highly transparency and refractive index and it has better light transmission characteristics than many conventional glasses.

Bring in the polycarbonate material into Foodservice industry, Thunder Group make public of this unique, elegant & stylish line back in 2009, which brings a new twist to professionals in the foodservice industry, flipping the concept of the traditional glassware in commercial environment. Polycarbonate drinkware looks and feels like glass, but, it is not glass. Its usage provides a perfect upscale dining experience while entertaining with friends and family in a safe environment indoor or outdoor. It also adds to the cost-saving in night clubs and bars' operational side in the long run because breakage will never be a concern or turn into a lawsuit for foodservice operators.

Starburst Pattern
