INDUSTRY STANDARD

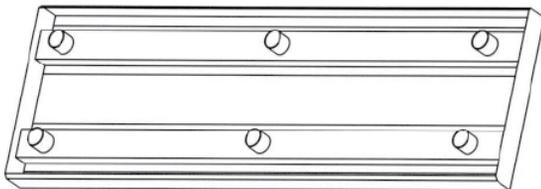

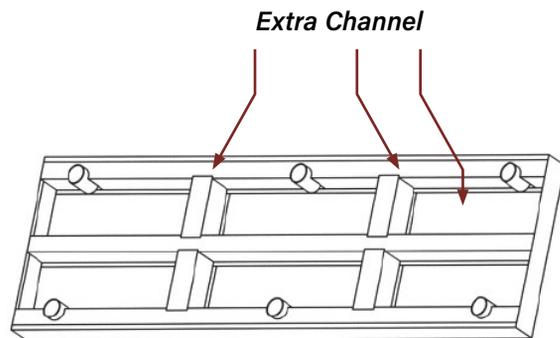

▪ WORK TABLES ▪

Our stainless steel tables are designed in the United States and manufactured in China. They are the highest quality work tables in the industry.

Built to last a lifetime, we use a three-channel design to maximize table strength. All other manufacturer's tables fall short.

Klinger's tables have extra channels to maximize strength and durability. We also offer a large undershelf compared to others.

Shown: Klinger's 96" long Table (SG3096)

The competition's tables use two channels, making them unstable, and prone to bending in the middle over time. They also have a narrow undershelf.

Shown: Competition's 96" long Table
